PEANUTS

Peanut is the major oilseed of India. It accounts for approx. 25% of the total oilseed manufacture of the country. Indian peanuts are consumed in over 50 countries. Indian peanuts are the only source that are available all round the year. Peanuts are an excellent plant-based source of protein, and are high in various vitamins, minerals and plant compounds. They can be useful as a part of a weight loss diet, and may reduce the risk of both heart disease and gallstones. We are supplying Java's variety and have a rich nutty flavor, sweet taste, crunchy texture and relatively longer shelf life.
